Dipl.-Phys. RWTH Aachen University

Dr.rer.nat. RWTH Aachen University

Dr. Volker Rose is a Physicist at Argonne National Laboratory and an Adj. Professor of Ohio University. He holds an advanced degree in physics (Dipl.-Phys.) and received a doctoral degree (Dr.rer.nat.) from RWTH Aachen, Germany. From 2001 to 2006, he conducted research at Research Center Julich, the largest interdisciplinary research center in Europe. He joined Argonne in 2006 as a postdoctoral researcher at the Center for Nanoscale Materials (CNM), and became Assistant Physicist at the Advanced Photon Source (APS) in 2007. He was promoted to the rank of Physicist in 2012. Currently he holds an interdivisional appointment between APS and CNM.

Dr. Rose's research focuses on the study of nanoscale materials by means of high-resolution x-ray microscopy techniques. He currently leads a team that develops a novel technique, which combines scanning probe microscopy with synchrotron x-rays ([SXSPM](#)). The goal is to achieve a fundamental understanding of nanoscale structures with both the ability to resolve nanometer structure and to provide detailed information about chemical, electronic, and magnetic state.

Dr. Rose has published about 50 journal articles and book chapters as well as given more than 50 invited talks at international conferences and higher institutions around the world. His work has been covered by media outlets including The New York Times, Chicago Tribune, Discover Magazine, Voice of America, and many more. Research achievements include a DOE Early Career Research Program Award in 2012, a prestigious R&D 100 Award in 2009, as well as an International Exchange Program Award, sponsored by U.S. Department of Energy and American Nuclear Society in 2004. In 2013, he was selected to participate in the Strategic Laboratory Leadership Program of The University of Chicago Booth School of Business. In 2015, the UChicago Argonne LLC Board of Governors honored Volker with the Pinnacle of Education Award, which recognizes the outstanding leadership in science through Argonne's educational programs.
